

FAIPS DPS British Curriculum Students Visit KDD Factory

The students of British Curriculum -5,6 and 7 of FAIPS DPS embarked on an exciting educational trip to the KDD factory in Kuwait on the 9th, 10th & 11th of December '24. The visit offered a fascinating glimpse into the world of food production and automation.

Upon arrival, the students were warmly welcomed and guided through the facility by an expert. They explored the production process, marveling at how various products were manufactured entirely by machines. The guide explained how these products are stored in enormous freezers to maintain their quality and freshness.

The highlight of the trip was an encounter with a charming robot, half the size of the children. The robot introduced itself and demonstrated its skills, performing quirky tasks like playing the trumpet and vacuuming the floor, much to the delight of the young audience.

To conclude this enriching experience, the students were treated to delicious ice cream, adding a sweet touch to the day.

The visit not only educated the children on modern manufacturing and robotics but also left them with cherished memories of a day well spent at one of Kuwait's leading food production facilities.
